CONSTRUCTION HAZARDOUS WORK PERMIT

Doc. No: AN/OHS-006/Ver1.0

Permit No._____

Other associated Permit(s): _____

Valid only when signed by an authorized issuer, delegated by management. This permit must be issued before specified work is started; it must be closed immediately after completion of the work or at the end of the shift as agreed by parties identified on this permit. Canceled/closed permits shall be filed in the site construction file and at the conclusion of the day will be returned to Ambuja Neotia for retention. A representative sample (two or three) will be sent to Head Office for review by management to ensure the process is followed. Maintaining a CHWP register is mandatory.

ISSUED TO: _____ _____ _____

NAME (RECEIVER) DESIGNATION / PORTFOLIO (RECEIVER) DATE

FOR WORK IN: _____ _____

EQUIPMENT / LOCATION AREA

STARTS AT: _____ A.M. / P.M. **EXPIRES AT:** _____ A.M. / P.M.

DESCRIPTION OF WORK TO BE DONE: _____

_____

This certifies that **I HAVE** personally completed a safety inspection of the area where this work is to be done, as well as the surrounding area, with specific attention to the type of work checked below. **I HAVE** reviewed the minimum precautions and equipment recommended in the Construction Safety requirements documents (Manual, Contractor's requirements, Contract Document and Site-Specific Safety requirements) and have indicated on the reverse side of this permit all necessary precautions taken to protect the personnel engaged in this work from accident and injury. **I HAVE** made sure that the personnel assigned for the task know the applicable safety rules and that they know what to do in an **EMERGENCY**.

☐ HELD PRE-JOB DISCUSSION _____ _____ _____ _____

(INITIALS of RECEIVER) Signed (Name) at Job Site by (ISSUER) Date Time

☐ Work satisfactorily completed
☐ Work not finished this shift
☐ CHWP area and equipment released in proper condition for normal use
☐ **CHWP conditions not met - CHWP cancelled. Job witheld**

_____ _____ _____

Responsibility accepted by (If original receiver leaves site) Date Time

_____ _____ _____

Canceled/Closed at Job Site by Date Time

This permit must be conspicuously posted in the immediate area where authorized work is being performed

The following type of works are covered by this CONSTRUCTION HAZARDUOUS WORK PERMIT:

☐1. Potential exposure to hazardous atmospheres - All work where confined spaces are created (Catchpits, Manholes, OH Tanks, UGR, etc.) during the construction phase, will consider the hazards associated with entry into these areas. Prior to the point where confined areas pose a hazard to personnel the contractor will plan work to maintain a **Toxic gas-free Confined Space**. **IF A CONFINED SPACE MEETS THE PERMIT REQUIREMENT, A SPECIAL PROCEDURE WILL BE PREPARED BY THE CONTRACTOR, REVIEWED BY SAFETY DEPARTMENT of AMBUJA NEOTIA PRIOR TO COMMENCEMENT OF ANY WORK.**

☐2. **Hot work / spark generating work**, Welding, Drilling, Grinding/cutting or Gas Cutting Operations in confined, overhead, unconventional, undefined, non-routine, or any other construction area where precautions, communications and fire watch may be required

☐3. Manual **Excavations and Trenching** exceeding 4 ft in depth and all mechanical excavation, boring.

☐4. Elevated and Overhead work - All work on scaffolds, temporary platforms, two legged ladders, tanks, and elevated positions in excess of 6 feet (1.8m) above floor level.

☐5. Crane lifts and critical rigging (Over 10 Tons or above 85% of **load chart** of the Safe Working Load of the Lifting appliance)

☐6. Demolition / Rework

☐7. **Suspended** work basket / Platform / Gondola / Boatswain's chair / Harness /

☐8. Working on or around **pressurized or energized systems / Pneumatic Testing / Hydraulic Testing**

☐9. **Maintenance Work**: Electrical, Mechanical Power or Lockout / Tagout

☐10. Removal of **Existing** Covers, Barricades, Railings, Lifelines, guards (during maintenance), existing Fire Extinguishers

☐11. Working on or near **Water body having depth more than 500 mm**

☐12. OTHER: _____

_____

_____

PRECAUTIONS TAKEN AND EQUIPMENT PROVIDED TO PROTECT PERSONNEL FROM ACCIDENT OR INJURY.
(Multiple categories may apply to any given job)

TASKS WILL NOT BE CONDUCTED WITHOUT CONTRACTOR PROCERDURE IN PLACE. Check items completed prior to start.

1. Potential Exposure to Hazardous Atmospheres
(Oxygen deficiency or enrichment, dust, toxic gas, and vapors)
Contractor procedure in place: YES NO
IDENTIFIED AS SPACE CONTAINING TOXIC SUBSTANCE: YES/NO, If ***Yes STOP***
Precautions Taken
☐ Circle of safety & JSA applied
☐ All valves and equipment locked and tagged
☐ Blinds ☐ Block and Bleed ☐ Piping Separation
☐ Process purged
☐ Ventilation provided ☐ Mechanical ☐ Natural Draft
☐ Atmosphere tested (O_2, H_2, CH_4, etc.) See Table Below.
☐ Attendant / Rescuer
☐ Training Drills
Equipment Provided
☐ Respirator
☐ Self-Contained Breathing Apparatus ☐ Negative Pressure ☐ Supplied Air
☐ Lifeline ☐ Safety Harness and Lanyard / Lifeline
☐ Shock Absorber ☐ Body or Wrist Harness
☐ Two-way communication ☐ Emergency Alarm
☐ Special Clothing ☐ Hood
☐ Dust Goggles
☐ Other (explain) _____

Oxygen, Combustible Gas, and Toxic Gas Test Results
Permissible safe limits for personnel: 19.5-22.0% oxygen.
Flammable gas concentration must be 10% lower than LEL.
Toxic gas concentration must be lower than PEL.
Record test every 60 minutes at a minimum. (Use extra sheet of paper to list additional readings, precautions taken and equipment provided)

	Time	O2	LEL	PEL	Location	Tested By
1st Test	_____	____	____	_____	_____	_____
2nd Test	_____	____	____	_____	_____	_____
3rd Test	_____	____	____	_____	_____	_____
4th Test	_____	____	____	_____	_____	_____
5th Test	_____	____	____	_____	_____	_____

2. Hot Work (Welding, Grinding, Cutting) (For any hot work, monitor for flammable and oxygen enriched atmosphere and record above)
Contractor procedure in place: YES NO
Precautions Taken
☐ Flammables / Combustibles (paper, rags, wood, etc.) protected
☐ Fire Watch Established
☐ Welding & Cutting equipment positioned properly
☐ Leads up and do not pose a tripping hazard
☐ Area hazards covered

Fire Protection
Precautions Taken
☐ Combustibles (paper, rags, wood, etc.) removed
☐ Combustible gas or liquid containers removed
☐ Area wet down ☐ Spark shields installed
☐ Fire watcher assigned ☐ Spark resistant tools
☐ Other (explain) _____
Equipment Provided
☐ Fire Hose
☐ Fire extinguishers
Type: ☐ **CO_2** ☐ Dry Powder ☐ Other _____
Size_____ Number _____

3. Excavations Exceeding 1.2 m (4 ft) Contractor procedure in place: YES NO
Precautions Taken
☐ Contractor has a competent person assigned to inspect & control condition of excavation on site
☐ Underground utilities identified ☐ Power equipment grounded
☐ Electrical or mechanical overhead clearances checked
☐ Barricades, flashers, pennants (area warning) placed
☐ Means of egress (ladder or steps) placed ☐ Side walls shored or laid back
☐ Area adequately lighted ☐ Material or soil removed from excavation edge

4. Elevated Work Contractor procedure in place: YES NO
Precautions Taken
☐ Ladder(s) inspected prior to use
☐ Ladder properly supported and leveled
☐ Tied Top ☐ Tied Bottom
☐ Scaffolds/platforms inspected for good repair and proper construction (secured flooring and guardrails)
☐ Work area roped off and warning signs in place
☐ Personnel assigned to warn of floor opening or other hazardous exposure.
☐ Tools and other equipment stored in safe manner
☐ Area cleared below prior to starting work
Equipment Provided
☐ Safety Harness and Lanyard anchored to independent rigid object
☐ Lifeline with rope grab shock absorber
☐ Full Body Harness
☐ Wrist harness (for preventing fall of hand tools)

5. Crane Lifts & Critical Rigging. Contractor procedure in place: YES NO
Precautions Taken
☐ Crane inspected before use ☐ Operator qualified by the contractor
☐ Electrical power line clearance (12ft) checked ☐ Outriggers supported; Crane leveled
☐ Barrier Installed ☐ Safety Observer Assigned
☐ Pre-job discussion held (load / lift) ☐ Slings inspected prior to use
☐ Special lift as per construction manual

6. Demolition / Rework
Contractor procedure in place: YES NO
Precautions Taken
☐ Disconnection of electrical cable connection/ water/ steam /gas line etc.
☐ Work schedules considered the minimum potential exposures to site personnel
☐ Competent qualified personnel assigned for tasks
☐ Clearance and safe area identified
☐ Barricades and warning signs are in place and obvious

7. Suspended work basket / Platform / Gondola / Boatswain's chair / Harness
Contractor procedure in place: YES NO
Precautions Taken
☐ Use strictly controlled ☐ Approved type only
☐ Lifelines and harnesses approved type with separate anchorage for each individual
☐ Communications established ☐ Pre-start checklist complete / TPLGA obtained

8. Working Around Pressurized or Energized Systems / Pneumatic Testing / Hydraulic testing
Contractor procedure in place: YES NO
Precautions Taken
Is work to be performed planned: YES NO, **If No - STOP**
☐ Access/egress, Hot work, Other on-going work considered in plan
☐ Specific hazards in the work area identified
☐ Test conducted as per approved guidelines
☐ Area cleared of non-test personnel and barricaded
☐ Discharge of safety relief valves directed away from personnel area
☐ Precautions taken for protection outside boundaries (blanks, bleeds, disconnects, power services)
☐ Formal discussions with personnel performing work or affected by this work held

9. Maintenance Work: Electrical, Mechanical, Power, Pressure line requiring Lockout /Tagout
Contractor procedure in place: YES NO
Precautions Taken: Type of power supply ☐ Hydraulic ☐ Pneumatic ☐ Steam ☐ Mechanical ☐ Electrical ☐ Other
☐ All valves locked and tagged
☐ Blinds installed ☐ Block and bleed valves positioned
☐ Piping separated ☐ Pressure bled from lines and equipment
☐ Instrument gas disconnected ☐ Attempt to start the equipment
☐ Mechanical energy blocked ☐ Maintenance lock / contractor lock required
LIVE ELECTRICAL WORK PERFORMED BY QUALIFIED ELECRTRICIAN ONLY
☐ Power supply locked and tagged ☐ Circuit checked for zero voltage
☐ Portable cords and electric tools inspected ☐ Safety back-up man appointed
☐ Self-starting mechanism deactivated
Equipment Provided
☐ Approved rubber and leather gloves ☐ Insulating mat ☐ Fuse puller
☐ Disconnect pole or safety rope ☐ Non-conductive hard hat
☐ Residual Current Circuit Breaker (RCCB)

10. Removal of Existing Grills & Guardrails of Floor Opening, Cut Outs, Service Shafts, Lift Shafts, Covers, Barricades, Railings, Lifelines
Contractor procedure in place: YES NO
Precautions Taken
☐ Instruction to personnel regarding hazards and safe working procedure
☐ Notification to other contractors / sub-contractors
☐ area below cut-out, lift shaft grill & guardrail fenced / barricaded and signage displayed
☐ Red light / Red flag / Red reflecting tape been displayed (for night)
☐ Separate routes for man and materials entry to be provided and kept clear
☐ Alternative fall protection/prevention provided
☐ Supervisor deployed to supervise the job

11 Working on or near Water body having depth more than 500 mm
Contractor procedure in place: YES NO
Precautions Taken
☐ Breath Alcohol Concentration (BrAC) of 0.00%:
☐ Workers engaged are fit and free from heart conditions and epilepsy
☐ Appropriate area fenced / barricaded and signage displayed
☐ Red light (for night) / Red flag / Red reflecting tape been displayed
☐ Appropriate number of workers trained for rescue operations
☐ Supervisor deployed to supervise the job
☐ Life buoy, ring buoy, boat hook, 30 meters life line, life jackets, including one for each of the rescue crew is available
☐ Audible alarm available

12. Others: _____
_____
